4. The Super Win Punch Board is played as a 9-pack pattern, on a 3-on card face and is played in the following manner. The Game ends after the 27th ball call. In the event of multiple winners on the same ball call, during the same Game event, Casino Agent will select punches in order from the first available punch starting from the top left and moving to the right, and then dropping down one row and starting again from the left and moving to the right, and continuing on in this manner until all punches have been selected on the Super Punch Board to determine the Game prize amount from the pay table and the resulting Game prize will be paid to the winners on a "split" basis. In the event that duplicate cards or faces are sold for the same game, all duplicates will be treated as a single card or face with any prizes paid on a "split" basis including progressives.
